Dear Jim:

Enclosed is the latest revision of the surface features of the Dunn Mine. You will notice that there is no area specified for ore pads or water retention ponds. The mine is not expected to start producing ore for another six months and the exact location for the water retention pond has not been determined.

We will send a newly revised map up when these decisions have been made. Thank you for your cooperation.

Sincerely,

*Dean Roberts*

Jim! No significant change right? Ron Right!  
Can thought of shopping the topsoil stockpiles? Nope!  
(But I will) or (have Atlas do it and send us the results)
